

SAFETY NOTE – URGENT MODIFICATION

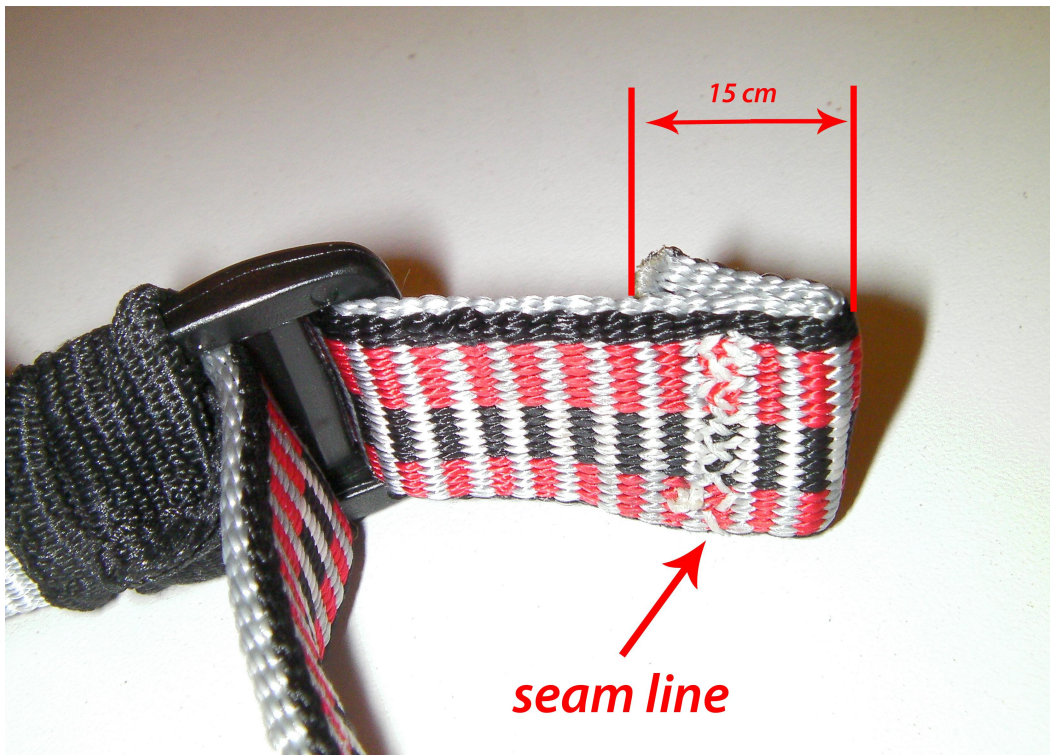

A modification needs to be done to every 2010 brake toggle produced with the Small plastic buckle under neoprene fabric.

In certain circumstances, the toggle webbing can extricate itself from the plastic buckle or the plastic buckle can be easily damaged.

This can be dangerous to the user. We would like to ask you to make modification as instructions below.

1. Fold the end of the strap and sew it together

2. Adjust the brakes size as needed and replace the neoprene over the plastic buckle
